I just wanted to let you know what a great service xm radios instant wheather ,and traffic provide.I have used it daily as I drive truck over the road.This service helps to better plan routes into and out of lager citys,you need to know what is going on ahead ,if more people had this service it would a great service to all,it would help police and emergancy services by using alternet routes . If we dont have this it cant be used as the local stations dont carry far enough and to hard to find, just listen to the chanel's and see what they do
